

TEDDINGTON HOUSE

Creating a harmonious and aesthetically pleasing bespoke rooflight, the Neo® Rooflight was designed to sit flush with the surrounding photovoltaic panels to maximise the potential energy-saving capabilities of this London based family home.

Utilising the high level of attention to detail we are known for, we matched the length and width sizes, and colour tones of the PV panels resulting in a uniform, stylish practical rooflight.

Through testing, collaboration with all parties involved and a tailor-made frame, we could ensure the rooflight provided the maximum viewable opening possible, allowing the below room to be flooded with light and providing plenty of ventilation.
