

Heritage Rooflight Specialists

It's in the Detail

About The Rooflight Co.

Our Mission:

Valued by our customers, we are the trusted partner of architects, contractors and custodians of prestigious properties, providing premium solutions for natural light from above, that are sympathetic to both traditional heritage, and innovative contemporary architectural spaces.

Working alongside architects, contractors and custodians of prestigious properties, we support their vision for the project. We are passionate about connecting people to spaces through harnessing the beauty of natural light from above whilst remaining sympathetic to the historic character of period properties and their surroundings.

Since 1993 we have been the specialists in Conservation Rooflights, continually developing our original design to ensure it maintains a true authenticity to its Victorian predecessors, whilst delivering a technical performance that meets the very latest building regulations requirements.

Each rooflight is hand-made in the Cotswolds by our skilled team of craftspeople. Their attention to detail and exceptional quality standards, are underpinned by our engineering and innovation teams who work with architects across the UK and internationally to deliver beautiful top lighting solutions.

Above all, we are dedicated to doing business the right way, with people and planet at the heart of who we are.
