

WOOD ROOM

The Wood Room project by Hive Architects is a masterclass in how to transform a functional house into a bright, contemporary, family home to a set budget.

With his design, homeowner and architect Rob McGinnes, realised an opportunity to create a unique sustainable extension that not only provided much-needed space for a growing family but also integrated seamlessly with the garden.

With an emphasis on timber innovation and sustainable design principles, the extruded pyramid roofs offer a bespoke aesthetic, optimising natural light and ventilation throughout the new extension through the clever placement of The Rooflight Co's Neo Rooflights.

The Neo Rooflight is the original low-profile contemporary skylight, combining the highest modern performance standards with a frameless, minimalistic appearance both inside and out. Complementing modern architecture, the Neo Rooflight perfectly accompanies any interior design, introducing natural light into private residences with elegance.

THE
ROOFLIGHT CO.
COTSWOLDS

‘Our decision to partner with The Rooflight Co was influenced by their reputation for quality and innovation. The slim profile, superior finish and contemporary aesthetic of their rooflights set them apart in the market, aligning perfectly with our vision for the project.’

Rob McGinnes, Hive Architects
