

THE NEO ROOFLIGHT

The Neo Rooflight is the original low profile contemporary skylight, combining the highest modern performance standards with a frameless, minimalist appearance both inside and out. Complementing modern or traditional architecture and interiors perfectly, Neo is available in a wide range of standard sizes. The flexibility of the Neo frame combined with our Bespoke Design Service makes it the ideal solution for bringing unusual design concepts to life.

The Neo Rooflight enables our customers to transform properties with natural lighting from above that not only serves their practical needs but enhances the design and beauty of the building.

Employee owned and a certified B-Corp organisation, we are committed to improving the standards of our products for our people and the local community and to reducing our impact on the environment.

We are The Rooflight Co. The premium rooflight manufacturer for properties of architectural significance.

The carefully considered design of the Neo Rooflight is a perfect balance of form and function. The rooflight echoes the minimalist look and feel of a sheet of glass and its clean lines complement modern, contemporary home interiors. At Rooflight Co we agonise over the detail of our roof windows because we believe that exceptional buildings require exceptional rooflights. Rooflights not only bring beautiful natural light into properties, they must also complement the façade of the building. To deliver this, our Neo Rooflights use three fundamental design cues:

o Flush to the roof line – our Design Engineers have created the perfect balance, achieving the much-desired low profile height, whilst simultaneously and consistently delivering Building Regulation compliant thermal performance. This is only possible with our patented steel frame design. Steel is the material of choice for delivering strong sections with small frame heights. Its design versatility is further demonstrated through our one-off project-specific commissions.

o Edge-to-edge glazing – since 2006 we have been pioneering the use of edge-to-edge overhead glazing. Our Neo design utilises the technical approach originally developed for skyscrapers. The commercial grade structural glazing enables us to deliver this highly contemporary aesthetic, so the Neo Rooflight appears like a sheet of glass in the roof.

o Frameless interior – Neo Rooflights blend seamlessly into any modern interior space. The frame of the rooflight lies in-line with the internal reveal, so when viewed from beneath, it appears totally frameless.

We are passionate about Rooflights. For us, it's the small and often overlooked details that make Neo, the original low profile contemporary skylight, the authentic choice for properties of architectural significance.
