

Key:

1. Type-A Linked Conservation Rooflight fixed to structural supports **2*** at linking detail using coach bolts **1b** fitted through fixing lugs **1c**.

2*. Structural support at the linking detail. Maximum width 88mm.

3*. 9/12mm Ply packers fixed to structural support **2***.

4*. Plasterboard lining with plasterboard stop to protect corner. Fixed to plywood packers **3*** and fitted behind rooflight Thermoliner **1e**.

5*. Plaster skim.

6*. Timber reveal to align with rooflight linings **1d** to provide a 'frameless' internal appearance.

7*. Silicone Seal. Apply a thick bead of low modulus neutral cure silicone along the top of the left hand rooflight edge rollover in a position where it will be covered by the right hand rooflight rollover. Apply silicone **just prior to** fitting the right hand baseplate.

***Indicates those components NOT supplied with the rooflight and are therefore supplied by the contractor/rooflight installer.**

PLEASE NOTE: These sectional details are provided as an installation suggestion. Due to the differing nature of installations, we strongly advise you to consult your rooflight installer to verify fitness for purpose. This drawing does not constitute a structural proposal. Sufficiency of structural supports to be checked by rooflight purchasers structural consultant.
